JOURNAL OF COMPUTER AND SYSTEMS SCIENCES INTERNATIONAL

(formerly Soviet Journal of Computer and Systems Sciences)

CONTENTS FOR 1993

Number 1

	Page
DULIN, S.K. and L.A. KISELEV: Management of Structural Matching in a Knowledge Base	1
KRASOVSKIY, A.A.: Problems of Qualitative and Analytical Optimal Control Theory	10
KRUT'KO, P.D. and G.A. CHKHEIDZE: Control Algorithms for Automatic Systems of High Dynamic Accuracy	16
LEVIN, A.G.: Lyapunov Function Construction of Systems Connected by a Common Coordinate	36
RUDEL'SON, L.YE.: One Approach to the Problem of Inputting Volatile Files of Variable-Length Records	43
SMAGINA, YE.M.: Conditions for the Existence of a Proportional-Integral Regulator in a Multi-Dimensional System with Incomplete Information	51
GETMANOV, V.G.: Reproduction of Nonstationary Dependences with the Use of Approximation Splines	58
YEGOROV, S.N.: Solution of a Lyapunov Matrix Differential Equation with Constant Coefficients	65
MOROZOV, S.A., A.D. CHERKAY, and I.I. SHAGURIN: Hardware for Character String Matching	71
SKVORTSOV, L.M.: Synthesis of Linear Systems by the Method of Polynomial Equations	82
BASHKEVICH, N.P., V.N. DUBININ, and S.A. ZINKIN: Application of Artificial Intelligence Techniques to the Design of Intelligent External and Mass Storage Management Systems	88
LITVINTSEVA, L.V.: Visualization of Three-Dimensional Scenes Based on Textual Descriptions for Intelligent Systems	98
RUBANOV, L.I.: A Dictionary Classification Method for an Error-Tolerant Computer National Language Recognition System	106
KUZ'MIN, A.B.: Properties of the Characteristics of Point Estimates of Random Signals	115
GRADETSKIY, V.G., M.YU. RACHKOV, YU.G. SIZOV, S.V. UL'YANOV, and F.L. CHERNOUS'KO: Mobile Systems with Vertical Displacement Robots	126
BOLOTNIK, N.N., N.V. GORBACHEV, and A.G. SHUKHOV: Combined Suboptimal Control of an Electromechanical System	143

Page

BRIEF COMMUNICATIONS

RESHETNYAK, YE.P.: An Adaptive Discrete Automatic System of Variable Structure 154

Number 2

GEORGIYEV, V.O.: Subject Domain Knowledge Representation Models for Interactive Systems (A Survey) 1

MOLOKOVA, O.S.: A Knowledge Acquisition Methodology for Expert Systems. Part 1. Primary Concepts and Definitions 19

KABANOV, S.A., L.YU. MEN'KOV, and A.S. SHALYGIN: Multicriterional Optimization of Dynamic Systems 23

PRYASHNIKOV, F.D.: Distribution of the Roots of a Characteristic Polynomial with Respect to a Polygonal Domain 30

LAZAREVA, A.B. and P.V. PAKSHIN: Asymptotic Properties of Linear Discrete Controls. III. Construction of a Quadratic Optimality Criterion and an Optimal System Based on Asymptotic Modal Relations 39

LEPP, R.E.: Approximation of Decision Rules in Stochastic Programming 46

VOROKHOBKO, YU.A. and A.L. LEBEDEV: Theory of Constructing Optimal Controllers in Oscillatory Systems Under Conditions of Incomplete Information 50

LUTSENKO, M.M.: Generation of Optimal Signal Carrier Frequencies Against a Background of Active Interference 57

ANISIMOV, V.YU. and E.V. BORISOV: Methods of Estimating the Reliability of Fuzzy Relations in Applied Artificial Intelligence Systems 63

MAKEYEV, S.P., V.V. PITSKY, and V.A. POLUDENKO: Matching the Developmental Goals of Large-Scale Engineering Systems to the Possibilities for Realizing Their Characteristics with Fuzzy Raw Data 67

BURYN, A.S. and V.V. VASIL'YEV: Decomposition of Linear State Estimation Procedures for Dynamic Systems 76

SAZYKIN, B.V.: A Decision-Making Model for Use Under Conditions of Uncertainty for State Predictions of a Stochastic System 81

FURSOV, V.A.: Accuracy Analysis and Construction of Identification Algorithms Based on Few Observations 89

YAZENIN, A.V.: Possibility Programming Models in Systems Optimization 95

Page

GUPAL, V.I., S.YA. ZHUK, and A.V. MUROVANYY: Combined Filtering and Segmentation of Images 105

SIMARANOV, S.YU.: Optimal Scanning Control in an Electronic Scanning Radar 111

BANOV, A.M. and YU.V. MIKHEYEV: Asymptotic Decomposition of Problems of Boundary Control of Heat Conduction Processes 121

SHALAMOV, A.S.: Model of a Multiple Resource Utilization System with Periodic Replenishment to a Fixed Level 131

LABROVSKIY, E.K. and A.M. FORMAL'SKIY: Stability of a Rod Control Process in the Presence of Longitudinal or Torsional Strain 139

KISLENKO, YU.I.: Tactile Sensation in a Walking Robot 150

BRIEF COMMUNICATIONS

MELESHCHUK, S.B. and N.V. SHCHERBAKOV: Experimental Off-Line Test Stand for Adjusting Real-Time Adaptive Control Systems 159

BELOMESTNOV, V.G., A.V. PASTUKHOVSKIY, N.N. PERVUSHIN, and V.A. SERENKO: Optimization of Product Assembly Time in a Robotics Complex with Multiple Manipulators 163

ADERIKHIN, I.V. and A.V. SAPRONOV: Method of Determining the Availability of a Decentralized Aircraft Control Station 167

BARANOV, A.A.: A Modified Method of Determining Transfer Functions by the Maison Formula 172

Number 3

MOLOKOVA, O.S.: Methodology for the Acquisition of Knowledge for Expert Systems. Part 1. Basic Concepts and Definitions 1

OTAKULOV, S.: Conditions for the Controllability of Differential Inclusions 6

NAUMOV, G.YE., V.V. PODINOVSKIY, and VIK.V. PODINOVSKIY: Subjective Probability: Representation and Derivation Methods 12

ANISMOV, V.YU. and E.V. BORISOV: Methods for Estimating the Reliability of the Realization of Fuzzy Relations in Applied Artificial-Intelligence Systems 24

ZABELIN, S.A. and A.I. KIBZUN: Control of Stochastic Systems under Fuzzy Conditions 29

BERSHTEYN, L.S. and V.B. MELEKHIN: Decomposition of Fuzzy Semantic Nets for Planning Integral Robot Operations 35

Page

ARSEN'YEN, V.N.: Determining the Accuracy Characteristics of a System from the Results of its Tests under Various Conditions 44

BUKHALEV, V.A. and V.Yu. SMIRNOV: Filtering a Markovian Process Which is Observed Jointly with a Step-Wise Perturbation 49

BONCHEV, V., V. VASILEV, I. POPOV, I. POPCHEV, G. SIMOV, and V. TADZHER: Constructing Expert Systems by Using Object-Oriented Programming 57

MAKEYEV, S.P., V.V. PITSYK, and V.A. POLUDENKO: Harmonizing the Goals of Development of Large Engineering Systems with the Capabilities of Realizing Their Characteristics When the Initial Information is Fuzzy 65

LUPINA, N.V., A.N. SLEPCHENKO, S.V. UL'YANOV, and M.M. SHAKHNAZAROV: A Hybrid Expert System with Depth Representation of Knowledge for the Design and Diagnostics of Bioengineering Products 74

SEGAL', I.R.: On a Class of Control Laws in the Activity Analysis Problem with Limited Resources 96

SHALAMOV, A.S.: Stochastic Model of Multiple Inventory Utilization System with One-Time Replenishment to Critical Level 101

SAZONOV, V.N.: Controlling a Game by Transmitting Information to an Opponent 112

BAYEV, V.V.: Modelling Real-Time Systems by Extending the Notion of Petri Nests 119

DOBRIN, B.YU., YU.B. DOBRIN, and N.B. RYKOVA: The UDMES Subject-Oriented Medical Expert System 124

ADAMATSKIY, A.I.: Complexity of Identifying Asynchronous Nonstationary Cellular Automata 127

BRANETS, V.N. and L.I. KOMAROVA: The Problems of Autotomizing Flight Control for Spacecraft and Space Stations 131

BRIEF COMMUNICATIONS

BRANDIN, V.N.: Trajectory Stability in Two-Point Boundary-Value Problems 138

VOLKOV, L.N. and A.N. PANASENKO: Dynamic Dampening of Perturbations in Robot Manipulators 144

MLECHIN, V.V. and B.V. NIKOL'SKIY: Investigation of Stochastic Control Systems with Coupled Multiplicative Nonlinearities 148

GORSKIY, A.A., I.G. KOLPAKOVA, B.YA. LOKSHIN, and S.A. POKROVSKAYA: A Dynamic Model of a Manufacturing, Storage, and Marketing Process 153

YELISEYEV, P.I.: Interpretation of Fuzzy Subsets in Modeling and Control Problems 158

PALAGIN, YU.I.: Optimal Parametric Models for Simulating Homogeneous Vector Random Fields and Processes 161

Page

NADZHAFOV, E.M. and L.G. KHASKEL'BERG: Algebraic Conditions for Absolute Stability of Nonlinear Discrete Systems 169

Number 4

GABASOV, R., F.M. KIRILLOVA, and O.I. KOSTYUKOVA: Optimization of a Linear Control System Under Real-Time Conditions 1

LYSENKO, A.I.: Optimal Trajectories of Dynamical Systems with Special Constraints 15

BIGIL'DEYEV, S.I. and YU.F. GOLUBEV: The Lagrange Relaxation Method in Optimal Control Problems 21

POPOV, N.M.: A Decomposition Method of Solving Problems of Controlled Dynamical System Design 28

KVARATSKHELIYA, N.G. and S.YU. SIMARANOV: Discrete Steady-State Moving-Target Tracking Filters 33

TERTYCHNYY, V.YU.: Optimal Procedures in the Parametric Estimation of Controlled Dynamical Systems. I. 39

SILOV, V.B.: Optimization of Multicriterial Systems of Fuzzy-Objective Control 47

PANKOV, A.R.: Recurrent Conditionally Minimax Filtering of Processes in Nonlinear Difference Stochastic Systems 54

GEYMAN, V.I.: Estimates of the Number of Switchings of a Relay Optimal Control for a Certain Class of Bilinear Controlled Systems 61

FARBER, V.YE.: A Comparative Analysis of the Forms of Quasioptimal Filtering Algorithms in the Case of Anomalous and Noninformative Measurement Results 71

TERTYCHNYY, V.YU.: Optimal Procedures in a Scheme of Parametric Estimation of Controlled Dynamical Systems. II 78

LEBEDEV, A.L.: The Observation of Bilinear Discrete Systems under Conditions of Incomplete Information 87

IVANOV, N.M., YU.F. KOLYUKA, V.S. POLYAKOV, and V.F. TIKHONOV: Ballistic-Navigational Calculations for the Encounter Between the "Giotto" Spacecraft and Halley's Comet 94

ANSHAKOV, G.P. and YA.A. MOSTOVOY: Present Problems in the Computer-Aided Design of Software for Real-Time Built-in Control Computers 98

BARANOV, V.B., V.I. SALYGA, and V.V. KHVAN: A Game Model of Adaptive Stochastic Control 104

AFANAS'YEV, S.A.: The Use of Conditional Approximation in Optimization Problems 113

SOKOLOV, S.V.: The Solution of Problems of Stochastic Analysis of Nonlinear Dynamical Systems When There Are Discrete-Continuous Perturbations 122

Page

KLIMOV, S.M., S.YA. NAGIBIN, and I.A. STREKALOV: Some Problems in the Design of Control Centers 127

MISHCHENKO, A.V.: The Distribution of Vehicles on Bus Routes with Imprecisely Specified Passenger Traffic 132

POGONYSHEV, S.A.: A Numerical Method for Investigating the Statistical Dynamics of Stochastic Systems 137

NEUSYPIN, K.A.: Synthesis of an Adaptive Controller for an Inertial Navigation System 143

IVANOV, N.M., V.S. POLYAKOV, V.N. POCHUKAYEV, and V.F. TIKHONOV: Ballistic Navigational Flight Calculations for the *Phobus* Automated Interplanetary Spacecraft 148

GOROKHOV, A.V. and V.YE. FARBER: Solution to the Problem of the Optimal Speed of Observation of Spacecraft Descending Through the Atmosphere 158

BRIEF COMMUNICATIONS

KOZHEVNIKOV, V.V.: The Concept of the Mathematical Modelling of Microprogrammable Devices 167

Number 5

KRUTKO, P.D.: The Synthesis of Algorithms for Controlling Tracking Systems of High Dynamic Accuracy 1

BUSHENKOV, V.A. and G.V. SMIRNOV: A Computer-Aided Method for Regulator Design 17

LYAPIN, L.N., YU.L. MUROMTSEV, and O.V. POPOVA: An Optimal, in the Sense of Minimal Energy Expenditure, Regulator for a Double-Integration Object 35

KUKHARENKO, N.V.: Synthesis of Modal Regulators in the Case of Incomplete System Controllability 43
